Playtile Soft Kids

Extra-soft PP tiles for children's play areas

Playtile Soft Kids is a specially formulated extra-soft polypropylene tile designed for children's play areas, school play zones, kindergartens and indoor play centres. The softer compound ensures a safe, comfortable surface that cushions falls and is gentle on young feet. Available in vivid, cheerful colours to create fun and vibrant play environments.

KEY FEATURES

- Extra-soft compound — cushions falls and impact for child safety
- Non-toxic, child-safe materials — suitable for all age groups
- Available in bright, vibrant colours to create fun play environments
- Easy to clean, maintain and rearrange — modular click-fit system
- UV-stable and moisture-resistant for indoor and covered outdoor use

BHARAT NATURAL ELEMENTS

ACCESSORIES

KERBS · CORNER PIECES · RAMP EDGES

Bharat Natural ELEMENTS

FINISHING ACCESSORIES

Professional edge trim for all installations

INSTALLATION ACCESSORIES

Kerbs & Corners

Complete your installation with a professional finish

Bharat Natural accessories are specifically designed to complement our tile range, providing clean, safe and professional perimeter finishing for all sports courts, garage floors and commercial installations. Available in matching colours for a seamless look.

Straight Kerb / Edge Trim

Straight ramp-profile edge piece that borders straight tile runs. Creates a smooth, professional perimeter and prevents tiles from shifting. Used along all straight edges of the installation.

Corner Piece

90° corner piece designed to finish external corners of the tile area cleanly. Pairs with straight kerbs to provide a fully enclosed, professional perimeter on all four sides of any installation.

Ramp / Entrance Kerb

Sloped ramp-profile edge piece ideal for garage and commercial entrances where vehicles or trolleys need to roll over the tile boundary safely. Prevents trip hazards at tile edges.

Colour Matching

All accessories are available in colours to match the main tile product range. Custom colours available for bulk orders. Please specify tile colour when ordering kerbs and corners.

Compatible with all Playtile and Bharat tile products

Available in matching tile colours · Bulk orders welcome

HOW TO INSTALL

TOOL-FREE • CLICK-FIT INTERLOCKING • QUICK & EASY

Bharat Natural ELEMENTS

Playtile interlocking PP tiles are designed for fast, tool-free installation. A standard court or area can be installed by a small team in a single day. Follow these steps for a professional, long-lasting result.

1

Assess & Prepare the Surface

Ensure the base surface is flat, clean and free of debris, dust or standing water. Tiles can be installed on concrete, asphalt, existing flooring or any solid, level surface. A flat base ensures a uniform, stable court.

2

Plan the Layout

Measure the area and calculate the number of tiles required (approx. 10.76 tiles per sqm). Plan the tile layout, marking the starting corner and direction of interlocking. Consider the court lines and colour zoning in your plan.

3

Position the First Tile

Begin at a corner of the installation area, placing the first tile with its interlocking edge connectors facing outward. This anchors the pattern for all subsequent tiles. Ensure it is square to the area boundary.

4

Click Tiles Together

Align each new tile with the connectors of the previous tile and press firmly until you hear or feel a click. Work row by row across the area. The click-fit connection requires no tools, glue or grout.

5

Trim Edge Tiles

Where tiles meet a wall or irregular boundary, cut them to fit using a handsaw, jigsaw or utility knife. Measure twice before cutting. Trimmed tiles retain their interlocking connectors on the remaining sides.

6

Install Kerb Edge Trim

Clip straight kerb pieces along all exposed edges and corner pieces at 90° corners. This provides a clean, safe perimeter, prevents tile lift and gives the installation a professional, finished appearance.

7

Inspect & You're Ready

Walk the full surface to ensure all tiles are securely locked and the kerbs are in place. The court or floor is immediately ready for use. No curing time required — unlike adhesive or poured floors.

INSTALLATION TIPS

- Store tiles flat in shade before installation to avoid warping
- Allow 3–5 mm expansion gap around walls in enclosed spaces
- Tiles can be removed and reinstalled — fully reversible
- Clean with water and mild detergent — no harsh chemicals
